Sequence 2, Application US/10089678

Sequence 2, Application US/10089678

Patent No. 6952977

GENERAL INFORMATION:

APPLICATOR: ASANO, Shinichiro

ITILE OF INVENTION: PROTEIN HAVING INSECTICIDAL ACTIVITY, DNA ENCODING THE PROTEIN,

ITILE OF INVENTION: NOXIOUS ORGANISM-CONTROLLING AGENT AND METHOD

FILE REPERBURE: 068821

CURRENT APPLICATION NUMBER: US/10/089,678

CURRENT APPLICATION NUMBER: US/10/089,678

PRIOR APPLICATION NUMBER: PCT/JP01/06660

PRIOR APPLICATION NUMBER: PCT/JP01/06660

PRIOR FILING DATE: 2001-08-02

NUMBER OF SEQ ID NOS: 3

SOFTWARE: PatentIn version 3.1

SEQ ID NO 2

LENGTH: 3504
                                                                                                                                                                       3199
                                                                                                                                                                                                                                              3259
                                                                                                                                                                                                                                                                                    3539
                                                                                                                                                                                                                                                                                                                                                         3599
                                                                                                                                                                                                                                                                                                                                                                                              3379
                                                                                                                                                                                                                                                                                                                                                                                                                                  3659

US-10-089-678-3

is Sequence 3, Application US/10089678

is Patent No. 6562977

GENERAL INFORMATION:

APPLICANT: ASANO, Shinichiro

ITILE OF INVENTION: PROTEIN HAVING INSECTICIDAL ACTIVITY, DNA ENCODING THE PROTEIN, PRILE OF INVENTION: PROTEIN HAVING INSECTICIDAL ACTIVITY, DNA ENCODING THE PROTEIN, PRILE OF INVENTION: PROTEIN HAVING INSECTICIDAL ACTIVITY, DNA ENCODING THE PROTEIN, PRILE OF INVENTION NOWBER: US/10/089,678

CURRENT APPLICATION NUMBER: US/200-204-03

PRIOR PELING DATE: 2000-08-03

PRIOR FILING DATE: 2000-08-03

PRIOR FILING DATE: 2000-08-03

PRIOR FILING DATE: 2000-08-03

Sequence 1, Application US/07812180A
Patent No. 5366892
GENERAL INFORMATION:
APPLICANT: Payne, Jewel M
APPLICANT: Payne, Jewel M
APPLICANT: Sieck, August J
TITLE OF INVENTION: thuringiensis Isolate and a No. 5366892el Gene Encoding a
TITLE OF INVENTION: Coleopteran-Active Toxin
NUMBER OF SEQUENCES: 2
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                              3234
